Customised Solutions from SOBAtec GmbH

Our systems are integrated into our customers' maintenance organisation and IT infrastructure. Where required, they can be supplemented by additional equipment, such as crane systems for handling heavy loads at roof level. Our scope of services also covers the dismantling of legacy installations, support with planning services, and the thorough modernisation and overhaul of existing systems.

Work Platforms

Machines and systems that give workshop staff an elevated standing, working and movement area

Test Systems

Test stations where rail vehicle components are tested reproducibly against their target specifications

Workshop Equipment

Robust machines and systems for manufacturing, testing or repairing rail vehicle components

Conveyor & Loading Systems

Machines and systems for moving wheelsets, bogies, rails and other unit loads along conveyor lines

SOBAtec has more than 25 years of industry experience, combined with in-depth expertise across the various maintenance processes.

Services from SOBAtec GmbH

SOBAtec provides tailored service solutions for the efficient operation of the systems in your workshops and plants. The focus is on maximum system availability, optimal workflows and employee safety. SOBAtec has a strong service team that supports customers on site or remotely.

Our services:

Maintenance Contracts

Packages tailored to the optimal operation of your system, e.g. spare parts bundles, inspection budgets and more, with full cost certainty.

Maintenance and Inspections

e.g. annual inspection in line with manufacturer specifications.

Training

Training on technical modifications, new features and more, aimed at increasing efficiency in maintenance workflows and preventing errors.

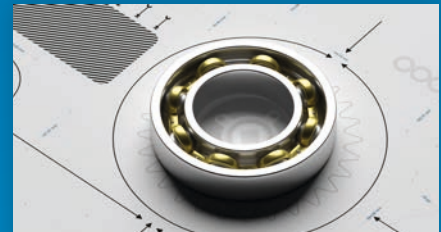

Retrofits

Retrofits in the form of software updates, technical conversions or extensions.

Repairs

Repair and maintenance work on identified damage

Original Spare Parts

meeting manufacturer quality standards.

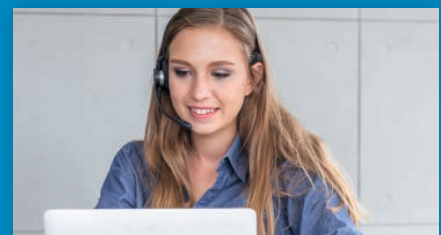

Remote Maintenance

Fault analysis, software updates, process improvement, etc.

On-Call Service

by individual arrangement, up to 24/7 with a 2-hour response.

Dedicated Contacts

Service advisors,

SOBAtec GmbH was founded in 2000, growing out of the four founders' long-standing background in the rail industry, and is based in Kamenitz, Saxony, near Dresden. SOBAtec has evolved from an engineering supplier into a system provider of turnkey installations, with in-house hardware and software development, installation and comprehensive service coverage for markets across Europe. Since 2026, SOBAtec GmbH has been part of the Autolift Group, headquartered in Elixhausen, Austria.
